FreeeUp Brand or MAP Protection Service

Do you know every business that is representing your product online? FreeeUp provides a Brand Protection service that identifies unauthorized sellers on the online for your products. The service is focused on tracking down all sellers of your products, determining which are unauthorized based off of your records, and removing them from selling your product.

Why Protect your Brand Online?

One of the biggest potential threats to brand owners face is the proliferation of unauthorized third sellers online because it leads to misrepresentation of their products. With the rapid growth of different Marketplace, it has become evermore easier for sellers to sell brand products without having the written approval from the brand. When this happens, it leads to pricing below MAP and infringement upon copyrights and trademarks.

Not being able to protect your brand from unauthorized sellers can tarnish your brand image and lead to a reduction of sales. In the worse case, there are unauthorized sellers that are receiving your products from counterfeit manufacturers and selling them to loyal customers who then receive a poor perception of your brand.

What FreeeUp Offers

FreeeUp provides workers who are pretrained to gather information of sellers, contact sellers, record information and present it to the client. We also offer consulting based on past experience and templates that a professional writer will custom write for you.

We do not verify that you have the right to your brand or that you are allowed to contact other sellers.
